DETAILED ACTION

This office action is in response to the application filed September 13, 2004.

Allowable Subject Matter

Claims 1-3 and 5-20 are allowed.

The following is an examiner's statement of reasons for allowance: while the use of covering copper with a refractory layer is known in the art as evidenced by Bersin et al. (U.S. 5,882,489) and Andreas (U.S. 2005/0059232), the prior art fails to disclose or make obvious covering the refractory layer with a semiconductor and removing a portion of the refractory and semiconductor formed on the substrate using a fluorine containing compound leaving the copper un-etched including all the limitations of the independent claim. In the prior art, the refractory layer is disclosed as being covered with either a dielectric material that is subsequently etched, or an additional metallic layer that remains a part of the contact.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited art shows the use of a refractory layer over copper.
